

HOW TO VOTE WITH THE SCANNER

1 SCAN YOUR BALLOT

- Animated **green arrows** show you where to insert your paper ballot.
- Insert your ballot into the scanner in any direction.
- There is no wrong way to insert your ballot, the scanner reads both sides of the ballot.
- Wait while your ballot is being recorded.

2 IF YOU SEE AN ERROR MESSAGE ON THE SCREEN

- Contact a poll worker for help
- If you marked too many choices on the ballot, the scanner will allow you to remove the ballot. Take it to a poll worker to be spoiled and get a new one.
- If you marked too few choices, the scanner will ask if you want to remove the ballot and make changes or cast the ballot "as is".

3 WAIT FOR CONFIRMATION

- Your ballot has been cast when you see the American flag.
- Your ballot will be physically stored in the locked ballot box.
- **CONGRATULATIONS!** Your vote has been cast!
