Liquid Waste Haulers Data / Pumping Management Program

Delaware County Health Department (DCHD) is excited to announce the start of the Liquid Waste Haulers Data / Pumping history Management & Reporting Program. This program will run in conjunction with our Liquid Waste Haulers Program and focus on reporting of all pumping activity performed on any Onlot Wastewater Treatment System in Delaware County.

The purpose of the Data Management program is:

- To provide a resource for municipalities to research / review reported history, frequency and activities performed on their properties.
- To monitor potential areas regarding ACT 537 planning.

This program will collect valuable data and information like number of gallons pumped, the general condition of the tank and if anything out of the ordinary was noticed by the pumper. This information will then be shared with Municipal Leaders and other Community Planners to help them in ACT 537 planning and initiatives.

All Pumping data that has been entered by the Delaware County Liquid Waste Haulers can be viewed here: <https://arcg.is/1DjX5r>

If you are a Licensed Liquid Waste Hauler in Delaware County and would like access to enter pumping information, please call (484) 276-2100 or email Environmental@co.delaware.pa.us. Please note you will be asked to provide your DCHD License Number and contact information for access.

If you have any questions, please call (484) 276-2100 or email at Environmental@co.delaware.pa.us.
