Upper Providence Township	100
Yeadon Borough	102

Performance Data Background

- The performance data packet was created using data sourced from Delaware County's computer aided dispatch (CAD) system.
- The County provided a data set covering mid-October 2019 through mid-January 2023. This analysis focuses primarily on 2022 while using 2020 and 2021 as historical reference points.
- It should be noted that this three-year period is heavily influenced by the pandemic and its various effects on demand for ALS service and hospital capacity.

Methodology

- The CAD data was cleaned to identify calls with valid time entries indicating when units were dispatched, en route, arrived on scene, transported, arrived at the transport destination, and marked themselves as available for the next call.
- Calls must have originated in Delaware County and contained valid time entries for each time interval to be included in the analysis. Of a total 143,000 calls in the data set, about 18 percent were eliminated for not meeting analysis criteria, leaving a total of about 117,700 calls from mid-October 2019 through mid-January 2023.
- For each call, the first ALS unit on scene was identified, along with the first transport leaving the scene. Time intervals were calculated based on these units, but it is important to note that there may have been multiple units on scene and transporting.
- Time intervals are expressed at the 90th percentile, in accordance with national standards. The 90th percentile provides communities with a reasonable expectation of service as it represents the time in which a large majority of calls are answered within. For example, 90 percent of all calls are responded to within the 90th percentile response time, or faster.
- **Response Time** is the sum of turnout time and travel time. The time between when the unit is dispatched and when it arrives on scene

Response Interval Guide

Interval	Start	End
Turnout Time	Dispatch	En Route
Travel Time	En Route	Arrival on Scene
Scene Time	Arrival on Scene	Transport
Transport Time	Transport	Arrival at Destination
Transport Arrival to Available	Arrival at Destination	Available
